Summary

Versatile Full-Stack Developer and adaptive problem-solver with a strong track record of engineering cross-platform application ecosystems, cloud databases, and automated content architectures. Adept at breaking down complex requirements into independent development cycles, balancing technical implementation with rigorous corporate compliance. Combines specialized software engineering skills in mobile and web development with a grounded background in hands-on operations, diagnostic troubleshooting, and independent, project-based execution.

Technical Skills

Languages & Databases

TypeScript, Python, JavaScript
ES6+, HTML5, CSS3, SQL, NoSQL,
Firebase Firestore, MongoDB,
MySQL

Frameworks & Cloud Platforms

React Native, Expo, Firebase
Functions, React.js, Express.js,
Node.js, Firebase Hosting, AWS,
Bootstrap, MUI, jQuery

Developer Tools

Firebase Analytics, Firebase
Crashlytics, Firebase Storage,
Firebase Cloud Messaging (FCM),
Linux, GitHub, MS Office, Heroku,
TestRail, Jira, Insomnia, Postman,
Charles Proxy

Security & AI Infrastructure

Firebase Authentication, Firebase
App Check, Google Cloud Vision
API, Geohashing, Threat Analysis,
Risk Assessment, Network
Security, Wireshark, tcpdump, IDS,
SIEM

Experience

Toochooz LLC - Creator of Toochooz

January 2025 - Present

Founder & Full-Stack Developer

- **Established a single-person LLC** to manage corporate compliance, financial operations, legal document hosting (ToS/Privacy Policy), and end-to-end product deployment.
- **Architected a real-time mobile application using TypeScript, React Native, and Expo**, deploying a custom match cooldown algorithm to enforce collaborative decision-making for couples.
- **Engineered a location-aware database** utilizing geohashing to automatically calculate and serve dynamic restaurant options within a user-customizable 35-mile radius.
- **Integrated Google Cloud Vision API** to implement automated content moderation, programmatically blocking explicit or unsafe images upon user recipe upload.
- **Built a central product website and a credential-locked moderator panel**, featuring user-driven data pipelines for crowd-sourced submissions, static informational pages, embedded app store badges, and compliant multi-platform legal frameworks (ToS/Privacy Policy).
- **Designed and seeded a proprietary location database** containing over 220,000 unique data coordinates across 500+ national brands, successfully eliminating reliance on high-cost third-party mapping APIs.

NuGrowth Solutions

Columbus, OH

Inside Sales Executive

February 2020 - May 2021

- Represented multiple accounts in the market daily, tripling number of impressions in the market
- Generated over 250 impressions into the market each week through phone and email
- Conducted product demonstrations and qualified prospects by identifying pain points and providing tailored solutions

Certifications & Education

Entry Certificate in Business Analysis

October 2024

International Institute of Business Analysis

Google Project Management Professional Certificate

August 2024

Coursera

AWS Certified Cloud Practitioner

July 2024

Amazon Web Services Training and Certification

CompTIA Security+ Certification

April 2024

CompTIA

Full Stack Coding certificate

October 2021

Ohio State University

Bachelor of Arts - History

August 2015 - May 2019

Ohio University
